PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1+ year of production experience building and shipping web applications using React.js, Node.js, .NET and Python. Delivered a multi-source financial data management platform integrating QuickBooks, Xero, Zoho Books and Wafeq, and embedded a generative-AI financial assistant using retrieval-augmented generation over vector search. Strong across the full stack: REST API design, Redux state management, relational and NoSQL data modelling, Docker, and GitHub Actions CI/CD. MCA graduate and published machine learning researcher.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Responsive UI, Component Libraries, Data Visualization

Backend: Node.js, Express.js, NestJS, FastAPI, .NET, REST API Design, JWT Authentication, Microservices

Generative AI: LangChain, Retrieval-Augmented Generation (RAG), Vector Databases, Embeddings, Prompt Engineering, LLM Chatbots, OpenAI API, Google Gemini, Anthropic Claude, Hugging Face

Machine Learning: Scikit-learn, Pandas, NumPy, Deep Learning, Neural Networks, Model Training and Evaluation

Databases: PostgreSQL, MySQL, MongoDB, Vector Databases

DevOps and Tools: Docker, Git, GitHub, GitHub Actions (CI/CD), Linux, AWS, Apache Airflow, Postman, VS Code, Jupyter Notebook

Data and Reporting: Microsoft Excel (Advanced Formulas, Pivot Tables, VLOOKUP/XLOOKUP, Conditional Formatting, Charts, Data Cleaning), Microsoft Office Suite, CSV/XLSX Data Processing, Financial Reporting and Reconciliation

Practices: Agile/Scrum, Code Review, Unit Testing, AI-Assisted Development, Debugging and Performance Tuning

PROFESSIONAL EXPERIENCE

Software Engineer — Sofyrus Technologies

May 2025 – Present | Aligarh, India

- Built and shipped **COCFO**, a financial data management platform that consolidates accounting data from QuickBooks, Xero, Zoho Books and Wafeq into a single reporting layer used by [N] client organisations.
- Developed the React.js front end with Redux for centralised state management, delivering reusable component libraries and interactive financial dashboards that cut manual report preparation time by [X]%.
- Designed and integrated REST APIs between the React client and .NET backend, standardising authentication, pagination, error handling and response contracts across [N]+ endpoints.
- Delivered an embedded generative-AI financial assistant chatbot that lets users query ledger and reporting data in natural language, removing the need for manual report lookups.
- Implemented GitHub Actions CI/CD pipelines for the development environment, automating build and deployment and eliminating manual release steps.
- Introduced AI-assisted development tooling into the team workflow and supported onboarding, reducing debugging and code-review turnaround time.

AI/ML Intern — Google Virtual Internship Program (AICTE EduSkills)

Jul 2024 – Sep 2024 | Remote

- Built and evaluated machine learning and deep learning models on real-world datasets, covering data preprocessing, feature engineering, model training and accuracy benchmarking.

Network Security Associate Intern — AICTE EduSkills (Palo Alto Networks)

Jan 2024 – Mar 2024 | Remote

- Studied and applied network security fundamentals, threat prevention, firewall policy design and secure network architecture principles.

PROJECTS

MediBot — RAG Medical Assistant | Python, LangChain, FastAPI, Vector Database, LLM APIs

- Built a retrieval-augmented generation assistant that grounds LLM answers in an embedded corpus of medical documents, using vector similarity search to retrieve context and reduce hallucination.

AI Resume Screener and Summarizer | FastAPI, React.js, Python, LLM APIs

- Developed an ATS-style screening tool that parses uploaded resumes, scores them against a job description and generates structured match summaries and improvement feedback for recruiters.

MediSync — Doctor Appointment Platform | MongoDB, Express.js, React.js, Node.js, JWT

- Built a role-based booking platform for patients, doctors and admins with slot management, JWT authentication and integrated online payments.

Twitter ETL Pipeline | Apache Airflow, Python, PostgreSQL

- Designed a scheduled Airflow DAG that extracts, transforms and loads social media data into PostgreSQL for downstream analytics, with retry and failure alerting.

Disease Prediction Models | Python, Scikit-learn, Pandas, NumPy

- Trained and evaluated classification models for disease prediction, reaching approximately 95% accuracy on held-out test data.

Secure Password Manager | MongoDB, Express.js, React.js, Node.js, Encryption

- Built an encrypted credential vault with JWT-authenticated access and full CRUD management of stored secrets.

EDUCATION

Master of Computer Applications (MCA) — Galgotias University, Greater Noida | 2023 – 2025

Bachelor of Computer Applications (BCA) — Dr. Bhimrao Ambedkar University, Agra | 2020 – 2023
